How TIST Works to Achieve Sustainable Development Goals.

By Martin Weru

TIST was developed by subsistence farmers to form Small Groups that would reverse the devastating effects of deforestation, drought, and famine. TIST farmers work together to identify local sustainable development actions that include tree planting and sustainable agriculture. TIST creates a communication and administrative structure that also addresses health (including HIV/AIDS), education, and nutrition.

Last month, I was able to represent TIST at the Carbon Africa Forum sponsored by UNFCCC, Nairobi Framework Partnership, UNDP among others. The conference was held in Conotou, Benin in West Africa. I spoke on **Co-benefits of Climate Action on the Achievements of SDG**. As part of my preparation and knowing that the people attending would probably be discussing the **Sustainable Development Goals (SDGs)**, I did some research and reviewed them on Wikipedia. I want to share what I learned, and ask you for help to identify ways that TIST now contributes to those goals, and to suggest ways that TIST contribute even more in the future.

The **Sustainable Development Goals (SDGs)**, officially known as **transforming our world: the 2030 Agenda for Sustainable Development** is a set of 17 “Global Goals” with 169 targets between them. They are spearheaded by the United Nations through a deliberative process involving its 193 Member States.

The 17 SDGs are listed below. Please review them. In addition, I've put some initial thoughts from some people of how TIST might contribute in italics:

Goal 1: No Poverty

No Poverty - End poverty in all its forms everywhere.

- Extreme poverty has been cut by more than half since 1990, however, more than 1 in 5 people live on less than \$1.25 a day.
- Poverty is more than lack of income or resources. It includes lack of basic services, such as education, hunger, social discrimination and exclusion, and lack of participation in decision-making.

- Gender inequality plays a large role in the perpetuation of poverty and its risks. Women face potentially life-threatening risks from early pregnancy, and often-lost hopes for an education and a better income.
- Age groups are affected differently when struck with poverty. Its most devastating effects are on children, to whom it poses a great threat. It affects their education, health, nutrition, and security. It also negatively affects the emotional and spiritual development of children through the environment it creates.

What TIST Farmers have done.....

- **Many TIST farmers have made their degraded land productive again. Through tree planting, Conservation Farming (CF) and Agro forestry practices, tens of thousands of hectares of small farms have gained fertility and productivity.**
- **Through rotational and servant leadership is all service and leadership points of TIST, both women and men have gained equal access to opportunities and benefits.**

Goal 2: Zero Hunger

Zero Hunger - End hunger; achieve food security and improved nutrition and promote sustainable agriculture.

What TIST Farmers have done.....

- **Many TIST farmers have practiced Conservation Farming. Majority of them have reported increased yields through CF**
- **Today, thousands of TIST farmers who have planted fruit and nut trees are reporting good harvest of fruits and nuts thereby increasing their nutritional supply for their families.**

Goal 3: Good Health and Well-being

Good Health and Well-being - Ensure healthy lives and promote well-being for all at all ages.

**What TIST Farmers have done.....**

TIST farmers through seminars and Cluster trainings receive HIV and Aids, malaria, nutritional, hygiene trainings, etc. They encourage and support those in need.

Goal 4: Quality Education

Quality Education - Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

What TIST Farmers have done.....

- In TIST, we have heard farmers sharing stories of how tree payments incentives help with school fees and or learning materials.
- TIST Mazingira Bora Newsletters and training at Clusters promote lifelong learning opportunities.

Goal 5: Gender Equality

Gender Equality - Achieve gender equality and empower all women and girls.

What TIST Farmers have done.....

- At the Small Groups, Cluster level, GOCC and LC level, members practice rotational leadership, thereby giving women equal empowerment .
- In TIST, the number of Women working and serving farmers is even. Women have equal opportunity for leadership training, etc.

Goal 6: Clean Water and Sanitation

Clean Water and Sanitation - Ensure availability and sustainable management of water and sanitation for all.

What TIST Farmers have done.....

- Through Riparian program that was received well by farmers whose land touch on water ways, many of them reported increased water quality and quantity.
- At Cluster meetings and through newsletters, farmers share a lot of ideas of how to improve hygiene and sanitation.

Goal 7:Affordable and Clean Energy

Affordable and Clean Energy - Ensure access to affordable, reliable, sustainable and modern energy for all.

What TIST Farmers have done.....

- When TIST introduced clean stoves, most farmers embraced them because they were affordable and helped save wood fuel and reduced smoke in the cooking areas.
- Through pruning and thinning of trees, farmers are now able to get sustainable fuel source - wood, and improved ways to use.

Goal 8: Decent Work and Economic Growth

Decent Work and Economic Growth - Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

What TIST Farmers have done.....

- TIST farmers led program has engaged more than 150 persons with flexible hours to allow continued management of primary asset - the farm.
- As trees matures, they continue to provide valuable income to support livelihood through sale of fruits, nuts, honey, wood products etc
- Cash income via tree payment incentives.

Goal 9: Industry, Innovation and Infrastructure

Industry, Innovation and Infrastructure - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

What TIST Farmers have done.....

TIST use of innovation, Information Technology and existing transport to allow youth, women, and men to immediately access new 'industry' (carbon) and create a 'virtual cash crop', which eliminates infrastructure limitations and restores productivity of degraded lands.

Goal 10: Reduced Inequalities

Reduced Inequalities - Reduce income inequality within and among countries.

What TIST Farmers have done.....

- TIST farmers have shown incredible support for youth and women especially at the Cluster meetings
- Tree incentives are additional income to the farmers, increased income through improved yields, making degraded land productive again, etc.

**Goal 11: Sustainable Cities and Communities**

Sustainable Cities and Communities - Make cities and human settlements inclusive, safe, resilient and sustainable.

What TIST Farmers have done.....

- **TIST farmers have embraced diverse cultures working closely with different languages, communities and supporting one another.**
- **TIST values encourage inclusion, safety, and sustainability.**

Goal 12: Responsible Consumption and Production

Responsible Consumption and Production - Ensure sustainable consumption and production patterns

What TIST Farmers have done.....

TIST have improved land fertility though CF, compost manure, agro forestry thereby increasing production sustainably, and provide for consumption.

Goal 13: Climate Action

Climate Action - Take urgent action to combat climate change and its impacts by regulating emissions and promoting developments in renewable energy.

What TIST Farmers have done.....

- **Today, TIST farmers worldwide have planted 16+ Million trees, thereby improving adaptation strategies to cope with vagaries of climate change**
- **Today, out of tree planting efforts, TIST farmers have removed over 3.5 million tones of CO₂ from the air.**

Goal 14: Life Below Water

Life Below Water - Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

What TIST Farmers have done.....

A significant number of farmers have planted water friendly trees in wetlands and along the waterways thereby protecting aquatic life.

Goal 15: Life on Land.

Life on Land - Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

What TIST Farmers have done.....

TIST farmers have planted millions of biodiversity enhancing trees and kept alive, bee habitats have thrived, agro forestry, degraded land put into productive use again.

Goal 16: Peace, Justice and Strong Institutions

Peace, Justice and Strong Institutions - Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

What TIST Farmers have done.....

TIST works with diverse communities, promoting cohesion through Cluster meetings, TIST Values!

Goal 17: Partnerships for the Goals

Partnerships for the Goals - Strengthen the means of implementation and revitalise the global partnership for sustainable development.

What TIST Farmers have done.....

TIST works with different partners including Kenya Forest Service, Taylors of Harrogate, Freshfields and USAID.

Now, we want your suggestions of what specific things you or your Small Group has done that has contributed to any of these 17 SDGs.

We also want to know your ideas on how TIST farmers or TIST training could improve our contributions to any of these SDGs - so that we were even BIGGER RESULTS with Low Budget!

Your Cluster Servant will have a discussion at your next Cluster meeting, and will write an email to me of your suggestions and results.

“Fruit Trees adds more benefit Get more from your Farm,” says Daniel Gichingiri.

Most TIST farmers have embraced fruit farming especially the citrus fruits. Daniel Gichingiri is one of the great Small Group farmers doing commendable job. His group name is New Nature Perfection TIST number 2008KE2615 from Burguret Cluster.

Daniel says, “Three (3) years ago I planted 100 citrus trees in 0.5 acres of land. Ninety-seven trees survived. I have so far managed to harvest 3 times. On average, each tree is giving me 30 fruits each harvesting season.” Citrus trees are doing well in this area. “I am now more encouraged to plant more trees. The market for the fruits is good. One fruit is selling at KES 15.00,” Daniel adds.

TIST is encouraging other farmers to plant more fruit trees. Besides the trees contributing with cleaning the air and thereby earning carbon revenue income, fruit trees add more benefits to the farmer such as Daniel.

Daniel further shares his knowledge about growing Citrus trees. “Citrus fruit farming is easy to manage and one doesn’t need to use expensive chemicals but only manure and water. I am

encouraging other TIST farmers to try the fruit farming way that will cater to the nutritional value in the family, and added income in most cases where fruits have a ready market.”

Besides citrus trees farming, Daniel is also growing avocado and mango trees. He is looking forward to more harvest as the trees grow big.

Kagumo TIST Small Group: Grateful for our tree planting efforts.

By Peter Mithiru, TIST Cluster Servant.

We, Kagumo Small Group 2008KE274, are happy to share our success with fellow farmers in TIST. To begin with, we belong to Nganoini TIST Cluster, which is a child Cluster from Muruku Pesi TIST Cluster, Nyahururu Region.

Our Small Group has so far planted 3,910 trees of different species with a mixture of fruit trees, indigenous and exotic trees. We do our own tree nurseries to get seedling for planting in our farms.

We believe the trees we planted today and take care of, will not only benefit us but also the future generations. Our resolve is to plant more

trees. With our area experiencing shortage of rains and therefore keeping our tree survival rate low, we have learnt a new best practice of making nurseries – raised seedbeds. We have developed an Action Plan to get a raised seed bed done.

We appreciate our Cluster Leaders for their selfless effort to bring our members together. Many thanks to George Gatuma (0711 813 538) Leader, Rosemary Muchina (0716140042) Co-Leader and Harun Kihia (0706162936) Accountability Person. If you wish to join TIST or get more information about TIST, you are free to contact any of them or our Cluster Servant, Peter Mithiru (0722 896 086).

How to Organize your Cluster for Success. Action Steps and Action Planning.

TIST groups do a lot of practical activities like planting trees and improving agricultural techniques. When there is a lot of work to be done, it is good to create Action Steps. Each group member should tell the group what they are going to achieve that week. TIST will teach you and your Small Group how to do Action Planning. Please share this with other members of your Small Group during your meeting.

An action step is something that is:

- Specific
- Observable (a fly on the wall can see you do it!)
- Measurable
- Has a beginning and an end
- Make sure your action step is realistic and that you can achieve it!

For example, saying 'I will plant trees' is not an action step because it is too general. 'I will work on three mornings this week to transplant 75 seedlings into our new grove' is an Action Step because it is specific (transplant 75 seedlings), observable (people can see you do it), measurable (75 seedlings, 3 mornings) and has a beginning and an end (at the end of three days you can see the results).

When your Small Group meets again, allow ten minutes near the end of the Small Group meeting for each person to report on his or her Action Step. Each person quickly:

- (1) Tells the group what their action step was for the past week.
- (2) States what they actually did.
- (3) States what action step they will take for the following week.

If the person succeeded in his or her Action Step, the group celebrates the success.

If, as often happens to start with, the group member met only part of his goal, the group encourages him / her and does not criticize or blame. When people are able to freely share their successes and failures they will be encouraged to

do better each week. Encourage your Small Group members to think of possible Action Steps. Make sure each is specific, measurable and realistic! Share and celebrate the action steps that your Small Group has accomplished.

Action Steps for Action Planning

A similar method can be used when Action Planning. When your group is planning what to do, make sure your plans are:

Specific (Our TIST Small Group will plant 1000 trees at the local hospital by November 30)

Measurable (How many? - 1000 trees will be planted)

Achievable/Realistic (Our TIST Small Group can plant 1000 trees in 5wks – 100 trees each Tuesday and Thursday, 10 trees per person/per day)

Time-bound (Has a beginning and an end - we will plant the trees between October 15 to November 30)

Observable (A fly on the wall can see us planting)

This is the guide and test of your Action Steps for your plan and helps you be specific:

- 1) **What** – (Planting 1000 trees)
- 2) **Who** – (TIST Small Group members by name)
- 3) **When** – (October 15 – November 30)
- 4) **Where** – (At the hospital)
- 5) **How** – (We meet every Tuesday and Thursday afternoon after the heat of the day and dig holes, then plant the trees)
- 6) **Why** – (To improve the area around the hospital, have more shade for patients and visitors, people can sit under trees and the shade will make the hospital cooler)

Practice Action Planning at your next Small Group meeting!

Jinsi TIST Inavyofanya Kufanikisha Malengo ya Maendeleo Endelevu.

Na Martin Weru

TIST ilianzishwa na wakulima wadogo ili kuwawezesha kuunda vikundi vidogo vinavyoweza kuwasaidia kutupilia mbali madhara mabaya ya ukataji miti, ukame na njaa. Wakulima wa TIST wanafanya kazi pamoja ili kutambua vitendo vya maendeleo endelevu vinavyojumuisha kupanda miti na kilimo endelevu. TIST inaunda miundo ya mawasiliano na utawala ambayo pia inashughulikia afya (ikiwa ni pamoja na WVU / UKIMWI), elimu na lishe.

Mwezi uliopita, nilikuwa na fursa ya kuwakilisha TIST kwenye mkutano wa Carbon Afrika Forum uliofadhliliwa na UNFCCC, Nairobi Framework Partnership na UNDP kati ya wengine. Mkutano huo ulifanyika Conotou, Benin, Afrika Magharibi. Nilzungumzia juu ya faida za matendo ya mazingira yanayolenga Mafanikio ya SDG almaarufu (**Co-benefits of Climate Action on the Achievements of SDG**). Kama sehemu ya maandalizi yangu na kujua kuwa watu wanaohudhuria wangekuwa wakijadili Malengo ya Maendeleo Endelevu (SDGs), nimefanya utafiti na kuchunguza kwenye Wikipedia. Ninataka kuwajuza yale niliyofunza, na kuomba usaidizi kutambua njia ambazo TIST inachangia kwenye Malengo hayo, na kupendekeza njia ambazo TIST inachangia hata zaidi nyakati zijazo.

Malengo ya Maendeleo Endelevu (SDGs), yanayojulikana rasmi kama **kubadilisha dunia yetu: Agenda ya 2030 ya Maendeleo Endelevu** ni mojawapo ya 'Malengo ya Kimataifa' kumi na saba (17) yenye Malengo mia moja sitini na tisa (169) kati yao. Inachangiwa pakubwa na Umoja wa Mataifa kupitia mchakato wa makusudi unaohusisha majimbo yake mia moja, tisini na tatu (193).

Malengo hayo ya Maendeleo kumi na saba (17) yameorodheshwa hapa chini. Tafadhali uyatathmini. Nimeweka mawazo ya hapo awali kutoka kwa watu wengine kuhusu jinsi TIST inaweza kuchangia katika italic (*Italics*) ili kuongezea:

Lengo la 1: Hakuna Umaskini

Hakuna Umasikini – Kuondoa umaskini wa aina wowote, kila mahali.

- Umaskini uliokithiri umekatwa kwa zaidi ya nusu tangu mwaka wa 1990, hata hivyo, mmoja kati ya watu watano (5) wanaishi chini ya dola 1.25 kwa siku.

- Umaskini ni zaidi ya ukosefu wa kipato au rasilimali. Inajumuisha ukosefu wa huduma za msingi, kama elimu, njaa, ubaguzi wa kijamii na kutengwa, na ukosefu wa ushiriki katika maamuzi.
- Usawa wa kijinsia una jukumu kubwa katika kuendeleza umaskini na hatari zake. Wanawake wanakabiliwa na hatari zinazohatarisha maisha kutoka mimba za awali, na matumaini potevu ya elimu na mapato mazuri.
- Vikundi vya umri vinaathiriwa tofauti na umasikini. Madhara yake huwa makubwa zaidi kwa watoto, ambao huwa tishio kubwa. Inathiri elimu, afya, lishe, na usalama. Pia huathiri vibaya maendeleo ya kihisia na kiroho ya watoto kupitia mazingira ambayo yanajengwa.

Yale yaliyofanywa na wakulima wa TIST.....

Sasa, tunataka mapendekezo yako kuhusu mambo maalum ambayo wewe au Kikundi chako Kidogo kimefanya kuchangia kati ya SDG zozote kumi na saba (17).

Tunataka pia kujua mawazo yako kuhusu jinsi wakulima wa TIST au jinsi mafunzo ya TIST yanaweza kuboresha michango yetu kwa SDG zilizotajwa - ili tuweze kuwa na MATOKEO BORA kwa Bajeti ya Chini!

Mtumishi wako wa Cluster atakuwa na majadiliano kwenye mkutano wa Cluster unaofuata, na ataandika barua pepe kwangu kuhusu mapendekezo yako na matokeo.

“Miti ya Matunda huongeza faida zaidi Yapate zaidi kutoka Shamba lako,” asema Daniel Gichingiri.

Wakulima wengi wa TIST wamekubali kilimo cha matunda hasa matunda ya machungwa. Daniel Gichingiri ni mmoja wa wakulima wadogo wadogo wanaofanya kazi nzuri. Jina la kikundi chake New Nature Perfection na nambari ya TIST number 2008KE2615 kutoka Cluster ya Burguret.

Daniel anasema kwamba miaka mitatu (3) iliyopita alipanda miti ya machungwa mia moja (100) katika ekari 0.5 za ardhi. Miti tisini na saba (97) ilinusurika. Ameweza kuvuna mara tatu (3). Kwa wastani, kila mti unampa matunda thelathini (30) kila msimu wa kuvuna. Miti ya machungwa hufanya vizuri katika eneo lake. Aninahimizwa kupanda mimea zaidi kwani soko la matunda ni nzuri. Anaongezea kwa kusema kwamba tunda moja ni huuzwa kwa shilingi kumi na tano (KES 15.00).

TIST inawahimiza wakulima wengine kupanda mimea zaidi ya matunda. Mbali na miti inayochangia kusafisha hewa na hivyo kupata mapato ya mapato ya kaboni, miti ya matunda huongeza faida zaidi kwa mkulima kama Daniel.

Daniel anagawa ujuzi wake kuhusu upandaji wa miti ya machungwa. Anasema ya kuwa Kilimo

cha matunda ya machungwa ni rahisi kusimamia na mmoja hana haja ya kutumia kemikali kubwa lakini mbolea tu na maji. Anawahimiza wakulima wengine wa TIST kujaribu njia ya kilimo ya matunda ambayo itasidia thamani ya lishe katika familia, na kuongeza mapato wakati ambao matunda yana soko tayari.

Mbali na kilimo cha machungwa, Danieli pia anakuza sukari na miti ya maembe. Anatazamia kuvuna zaidi kama jinsi miti inavyokuwa mikubwa.

Kikundi kidogo cha TIST ya Kagumo: Kuthamini kwa jitihada zetu za upandaji miti.

Na Peter Mithiru, mtumishi wa Cluster ya TIST.

Sisi, Kikundi kidogo cha Kagumo 2008KE274, tunafurahia kugawa mafanikio yetu na wakulima wetu katika TIST. Kwa mwanzo, sisi ni wa Cluster ya TIST ya Nganoini, ambayo imejitoa kutoka Cluster ya TIST ya Muruku Pesi, mkoa wa Nyahururu.

Kikundi chetu kidogo kwa sasa kimepanda miti elfu tatu, mia tisa na kumi (3,910) ya aina tofauti na mchanganyiko wa miti ya matunda, miti ya asili na ya kigeni. Tunafanya vitalu vya miti yetu kupata mimea ya kupanda katika mashamba yetu.

Tunaamini kwamba miti tuliyopanda leo na kuitunza, haitatusaidia tu bali pia vizazi vijavyo. Tumeonelea kupanda miti zaidi. Katika eneo letu

lililo na upungufu wa mvua na kwa hivyo kuweka kiwango cha maisha yetu chini, tumejifunza mazoezi bora zaidi ya kufanya vitalu vilivyooinua vya mbegu. Tumeanzisha Mpango wa Hatua ili kupata kitanda cha mbegu kilichoinuliwa.

Tunawashukuru Viongozi wetu wa Cluster kwa jitihada zao za kujitegemea kuleta wanachama wetu pamoja. Shukrani nyingi kwa George Gatuma (0711813538) Kiongozi, Rosemary Muchina (0716140042) Kiongozi Msaidizi na Harun Kihia (0706162936) Mtu wa Kujibika. Kama unawania jujiunga na TIST ama kupata habari za ziada kuhusu TIST, uko huru kuwasiliana na mmoja wa wasaidizi wa Cluster, Peter Mithiru (0722896086).

Jinsi ya kupangia mafanikio katika cluster yako Hatua na Mipango ya utekelezaji.

Vikundi na cluster za TIST hutenda vitendo vingi: Upandaji miti na kuboresha njia za kilimo. Kunapokuwa na kazi nyingi ya kufanyika , ni vizuri kuunda hatua za utekelezaji. Kila mwanakikundi lazima aseme kwenye kikundi nini atafanya wiki hiyo. Tutawafunza, Kikundi chako kidogo na cluster yako jinsi ya kufanya upangaji wa utekelezaji wa kitendo.

Tafadhalii jifunze pamoja wanachama wengine wa cluster yako wakati wa mkutano wako.

Hatua ya utekelezaji ni kitu ambacho ni:

- Mabsusi.
- Kinaonekana.
- Kinachoweza kupimika.
- Kina mwanzo na mwisho.
- Hakikisha hatua yako ya utekelezaji ni ya kweli unaweza unayoweza kufikia!

Kwa mfano, kusema ‘ Nitapanda miti “sio hatua ya utekelezaji kwa sababu iko jumla sana.” Nitafanya kazi siku tatu asubuhi wiki hii kupandikiza miche sabini na tano katika shamba letu jipya ” ni hatua ya utekelezaji kwa sababu ni maalum (kupandikiza miche sabini na tano), inaoonekana (watu wanaweza kuona ukifanya) inapimika (miche sabini na tano , asubuhi tatu) na ina mwanzo na mwisho (mwisho wa siku tatu unaweza kuona matokeo).

Wakati cluster yako itakutana tena, mruhusu dakika kumi karibu na mwisho wa mkutano wa kikundi kidogo ili kila mtu aweze kutoa taarifa kuhusu hatua yake ya utekelezaji. Kila mtu kwa haraka :

- (1) Aeleza kikundi hatua yake ya utekelezaji ya wiki iliyopita.
- (2) Aseme alichofanya kwa ukweli.
- (3) Aeleze hatua ya utekelezaji ya wiki inayofuata.

Kama mtu alifanikiwa katika hatua yake ya utekelezaji, kundi lisherehekee mafanikio. Kama, kama mara nyingi inavyotokea, mwanakikundi alikuweza kufanya sehemu tu ya lengo lake , kundi linamhimiza na halimkosoi au kumpa lawama. Wakati watu wana uwezo wa kuongea kwa uhuru kuhusu mafanikio yao na kushindwa kwao watakuwa na moyo wa kufanya vizuri zaidi kila wiki. Hamasisha wanakikundi / wanachama wa cluster yako kufikiria hatua

wanazoweza kuchukua. Hakikisha kila mojawapo ni maalumu , inapimika na yaweza kufanyika! Ongeeni na msherehekee hatua za utekelezaji ambazo kikundi au cluster yenu imeweza kukamilisha.

Hatua za Utekelezaji katika Mipango ya utekelezaji

Mbinu sawa inaweza kutumika wakati wa kupanga. Hapa, mfano umetolewa katika mabano . Wakati kundi lako linapanga cha kufanya, hakikisha mipango yenu ni:

Maalum (Cluster yetu itapanda miti elfu hamsini katika mashamba yetu kabla ya Desemba tarehe ishirini)

Inayopimika (Mingapi? Miti elfu hamsini itapandwa)

Inayoweza kufikiwa / Ya Kweli (Kila Kikundi kidogo cha TIST katika cluster yetu kinaweza kupanda miti elfu moja katika wiki tano - miti mia moja kila Jumanne na Alhamisi , miti kumi kwa kila mtu / kwa siku)

Imefungwa kiwakati (Ina mwanzo na mwisho - sisi kupanda miti kati ya Novemba kumi na tano - Desemba ishirini)

Inaonekana

Huu ni mwongozo na mtihani wa hatua zako zampango wako wa utekelezaji na inakusaidia kuwa maalum :

1. **Nini** - (Upandaji wa miti elfu hamsini)
2. **Nani** - (Wanavikundi vya TIST kwa majina)
3. **Wakati** - (Novemba 15 - Desemba 20)
4. **Wapi** - (hospitali)
5. **Jinsi** - (Sisi kukutana kila alasiri ya Jumanne na Alhamisi baada ya joto ya siku na kuchimba mashimo, kisha kupanda miti)
6. **Mbona** – (Kuboresha eneo linalozunguka hospitali, kupata kivuli zaidi kwa ajiri ya wagonjwa na wageni, watu wataweza kukaa chini ya kivuli na kivuli kitafanya hospitali kupunguza joto.

Jaribuni mipango na hatua za utekelezaji katika mkutano wa kikundi chako unaofuata!
